What is LBRY?

LBRY is a free, open, and community-run digital marketplace.
A protocol that allows artists to upload their content to a network of hosts (like BitTorrent) and set a price per stream or download (like iTunes) or give it away for free (like YouTube without ads) using Blockchain technology.

Why is LBRY good?

YouTube can afford to push around its creators and users because they've created tremendous lock-in. LBRY is challenging this model from the ground-up. Everything we've built is open-source, decentralized, and belongs to the community using it. LBRY Inc. could go bankrupt tomorrow and the LBRY protocol will live on. Can YouTube say that?

What are the development updates for LBRY?

-Converting Crypto to LBC via ShapeShift
The latest version of LBRY now has an area in the Get Credits tab of the Wallet which allows users to deposit their crypto and convert to LBC directly, without ever leaving the app.
-Subscriptions
The newest release of the LBRY app allows users to subscribe to their favorite creators.
